<u>Document version</u>	1.0
<u>Effective date</u>	4 June 2026
<u>Document prepared</u>	5 June 2026

Note to reviewer (Revolut): This document consolidates, in a single professional pack, the public Game Rules, Terms & Conditions, and Privacy Policy that govern the WorldCup26 service, together with a summary of the responsible-play, anti-money-laundering, and customer due-diligence controls the Operator applies. Stack Finance sp. z o.o. is a Polish company and a registered Virtual Asset Service Provider (Virtual Currency Business Activity Register No. RDWW-1102). The single item still shown in **[square brackets]** above — the registered office address — should be inserted from the company's KRS extract before submission.

1. Introduction and Nature of the Service

1.1 What WorldCup26 is

WorldCup26 is a fantasy football (association football) game of skill built around the FIFA World Cup 2026 tournament. A participant uses knowledge, judgement, and analysis to select three (3) national teams for a single contest. Those teams then accumulate points based on the real, official, real-time performance of those teams in the tournament, measured against a fixed and publicly-published scoring system. A participant's standing on the public leaderboard is the sum of the points earned by their three selected teams.

WorldCup26 is, in plain terms, a fantasy-sports competition: the participant assembles a small "squad" of teams and competes against other participants to achieve the highest skill-based score over the course of the tournament.

1.2 Subscription model — one subscription, one entry

WorldCup26 operates on a subscription / single-entry model. A participant pays a fixed, one-time subscription (referred to in the application as an "entry ticket") which entitles them to one (1) single entry into the contest.

- There is one entry per subscription.
- There are no repeat stakes, no rolling wagers, and no "double-or-nothing" mechanics.
- The subscription price is fixed and disclosed in advance and is identical for every participant.
- Once an entry is created and locked, the participant simply follows the tournament; there is nothing further to stake, bet, or risk.

1.3 What WorldCup26 is NOT

For the avoidance of doubt, and to assist payment and banking partners in correctly classifying the business, WorldCup26 is expressly not the following:

- It is not gambling and not a game of chance.
- It is not a sportsbook and does not offer fixed-odds or any odds-based betting.
- It is not a betting exchange and does not match wagers between users.
- It does not accept multiple bets, accumulators, parlays, or in-play wagers.
- It does not offer casino, slots, lottery, bingo, or any chance-based product.
- The Operator does not act as a bookmaker, does not "lay" outcomes, and holds no position against the participant.

1.4 Why WorldCup26 is a game of skill

WorldCup26 is a predominantly skill-based competition for the following reasons:

1. Fixed, published rules. The scoring formula, team coefficients, stage coefficients, prize structure, and paid places are all defined and published before the tournament begins and are not changed once play starts. Every participant competes under identical, known rules.
2. Outcome determined by knowledge and judgement. Success depends on the participant's analysis of team strength, form, draw difficulty, and tournament progression — not on a random draw, spin, or generator.
3. No wager against the house. The participant does not bet against the Operator or any counterparty. The subscription is an entry fee into a skill competition, not a stake on an outcome.

4. Common pool, ranked result. All participants are ranked on a single leaderboard; prizes are awarded to the top-ranked participants by skill, in the manner of a tournament or competition.

1.5 Real-time data basis

Player scores are calculated exclusively from official, real-time tournament data — match results, goals, clean sheets, and stage progression — as published for the FIFA World Cup 2026. Points are applied automatically after each relevant match using the fixed scoring rules in Section 3. The Operator does not set, influence, or trade on these results; it merely ingests the official real-time data and applies the published formula.

2. Definitions

Term	Meaning
<u>"Operator"</u>	Stack Finance sp. z o.o. ("Stack Finance LLC"), a Polish limited liability company (KRS 0001077664, NIP 7011181285) and a registered Virtual Asset Service Provider (Virtual Currency Business Activity Register No. RDWW-1102), which owns and operates WorldCup26.
<u>"Participant" / "you"</u>	A natural person aged 18 or over who holds a WorldCup26 account.
<u>"Account"</u>	The participant's WorldCup26 profile, created via Google sign-in.
<u>"Subscription" / "Entry Ticket"</u>	The fixed, one-time fee that entitles a participant to one single Entry.
<u>"Entry"</u>	A single, locked selection of three (3) teams for a contest.
<u>"Wallet"</u>	The participant's internal balance ledger held within WorldCup26, denominated in USDT.
<u>"USDT"</u>	Tether, a US-dollar-pegged stablecoin, used for deposits and payouts on the TRC-20 and ERC-20 networks.
<u>"Prize Pool"</u>	The aggregate player-facing prize fund for a contest, distributed to top-ranked participants.
<u>"Leaderboard"</u>	The public ranking of participants by total points.
<u>"Coefficient"</u>	A fixed multiplier applied to base points (per team and per tournament stage).

3. Game Rules

3.1 Eligibility

To take part you must:

- be at least 18 years of age;
- sign in with your own genuine Google account;

- participate only from a jurisdiction where doing so is lawful for you; and
- operate only one account — operating multiple accounts to gain an advantage is prohibited.

3.2 Creating an entry — selecting three teams

Each valid Entry consists of exactly three (3) national teams chosen by the participant. An Entry can be finalised (locked) only when exactly three teams are selected. The participant's total score is:

```
user_total_points =
  selected_team_1_points
+ selected_team_2_points
+ selected_team_3_points
```

3.3 Team lock / cut-off

A team remains selectable until shortly before its first World Cup 2026 match begins, after which it locks and can no longer be added to a new Entry. Late participants may still join after the tournament has started, provided every team they select is still open. A team becomes unavailable for new Entries once its second group-stage match starts — so a late entrant may pick a team that has played only its first group match, but may not pick a team whose second group match has already begun. This rule exists to keep the competition fair and consistent for all participants.

3.4 Scoring formula

Each team's points for a match are calculated as:

```
final_points = base_points × team_coefficient × stage_coefficient
```

where:

```
base_points = result_base_points + goal_bonus_points + clean_sheet_bonus_points
```

3.5 Base points

Result	Base Points
Qualification in 90 minutes	5
Qualification after extra time	4
Qualification after penalties	3
Loses after extra time	1
Loses after penalties	1.5
Loses in 90 minutes	0
Group-stage win	5
Group-stage draw	2

Result	Base Points
Group-stage loss	0
Goal scored bonus	+0.5 per goal
Clean sheet in 90 minutes	+1

A clean sheet means the team concedes no goals in the first 90 minutes of play.

3.6 Team coefficients

Each team carries a fixed coefficient, set before the tournament and never changed once play begins. The strongest favourites carry a coefficient of 1.00; the biggest underdogs carry up to 3.00. Selecting an underdog therefore carries a higher reward multiplier — a skill-and-judgement trade-off for the participant.

Team (example)	Coefficient
Spain	1.00
France	1.00
England	1.12
Brazil	1.19
Japan	1.86
Ghana	2.47
Australia	2.73
Curaçao	3.00
Panama	3.00

3.7 Stage coefficients

Stage	Coefficient
Group Stage	1.00
Round of 32	1.20
Round of 16	1.35
Quarter-final	1.50
Semi-final	1.75
Third-place Match	1.25
Final	2.00

3.8 Worked examples

Example 1 — Curaçao wins a group match 2–0:

```
base_points  = 5 + (2 × 0.5) + 1 = 7
final_points = 7 × 3.00 × 1.00 = 21
```

Example 2 — Spain wins the Final 2–0:

```
base_points  = 5 + (2 × 0.5) + 1 = 7
final_points = 7 × 1.00 × 2.00 = 14
```

3.9 Leaderboard and ranking

The public Leaderboard ranks every Entry by total accumulated points, shown in Pick 1 / Pick 2 / Pick 3 order with each team's point contribution. Ranking determines prize eligibility under Section 4.6.

3.10 Data sources

Scoring is derived from the official FIFA World Cup 2026 schedule and results and the published 104-match fixture list. Team reward coefficients are derived from public pre-tournament market baselines and are fixed for the whole event so the game remains fair after kick-off.

4. Terms and Conditions

Effective 4 June 2026. These Terms govern accounts, subscriptions, entries, deposits, referrals, prizes, and payouts on WorldCup26. By creating an account or an Entry, you accept these Terms and the Privacy Policy in Section 5.

4.1 Acceptance of terms

Participation requires explicit acceptance of these Terms and the Privacy Policy, which is recorded per participant. Where the Terms or Privacy Policy are materially updated, you must re-accept the current version before creating a further Entry.

4.2 Accounts and sign-in

WorldCup26 is for adults only (18+). You must sign in with your own Google account and use the service only where lawful for you. One person may not operate multiple accounts to gain an advantage. You are responsible for protecting your Google account and for all activity under your Account.

4.3 Subscriptions, wallet, and deposits

- Each Entry costs one subscription (entry ticket) — a fixed buy-in paid from your WorldCup26 Wallet balance.
- The Wallet is funded by USDT deposits on the TRC-20 or ERC-20 network.
- Deposits are credited only after the Operator verifies the transaction, network, amount, and receiving address.

- You must send only the supported asset and network shown in the wallet. Blockchain transfers are irreversible, and unsupported transfers may be permanently lost.
- The internal Wallet ledger is the single source of truth for balances.

4.4 Entry and participation

Each valid Entry selects three teams and locks per Section 3.3. Points and leaderboard positions are calculated solely from official tournament results and the fixed published coefficient rules. The Operator does not alter results and applies the same automated rules to every participant.

4.5 Referral programme

The Operator may offer a referral programme in which a participant who invites another participant can earn a reward. Referral rewards apply only when a referred participant creates a valid Entry and accepts the referral terms shown in the entry flow. Where a referred participant wins a paid prize, a referral reward is allocated to their inviter — 3% for a standard inviter, and 5% where the inviter themselves joined through the referral chain — and is accounted for in settlement. The Operator may reject self-referrals, duplicate accounts, abuse, chargebacks, or entries that violate these Terms.

4.6 Prizes and prize pool

- Prizes are awarded to top-ranked participants on the Leaderboard under the published prize-pool and paid-places rules.
- From the gross subscription income for each contest, the Operator retains a fixed, pre-disclosed administration and service fee (currently twenty percent (20%) of gross contest subscriptions); the remaining amount forms the player Prize Pool.
- Paid places: for a contest with 100 or more participants, the top ten (10) are paid; for a smaller contest, approximately the top ten percent (10%) of participants are paid (at minimum the leader).
- Distribution of the Prize Pool across up to ten paid places is by fixed weighting:

Rank	Share of Prize Pool
1	35%
2	20%
3	13%
4	9%
5	7%
6	5%
7	4%
8	3%
9	2%

Rank	Share of Prize Pool
10	2%

4.7 Withdrawals and age verification (18+)

Because WorldCup26 is for adults only, before any withdrawal or prize payout you must prove you are at least 18 years old by sending the government photo identification the Operator requests (reviewed off-platform).

- Payouts are held until your age is confirmed; if it cannot be confirmed, the Operator may withhold the payout.
- Settlement may also require eligibility, sanctions, tax, or payment review.
- Withdrawals are paid in USDT to a participant-supplied address, after operator approval, and are recorded with an audit note and external transaction reference.
- The Operator may correct obvious errors, void fraudulent entries, suspend accounts, or delay settlement while investigating account activity.

4.8 Fair play and prohibited conduct

You must not: operate multiple or duplicate accounts; use bots, scripts, or automated means to gain an advantage; attempt to manipulate scoring, deposits, referrals, or payouts; or use the service for money laundering, fraud, or any unlawful purpose. Breach may result in suspension, voided entries, and forfeiture of improperly obtained amounts.

4.9 Geographic restrictions

Paid participation is subject to configurable jurisdiction controls. The Operator may restrict or block deposits, subscriptions, and entries from particular countries to comply with applicable law. You are responsible for ensuring participation is lawful where you are.

4.10 Fixed rules; no mid-tournament changes

The game rules in force when you enter apply to your participation for that event and are not changed mid-tournament. The Operator may update these Terms for future events or where payment operations or legal requirements change; material updates require fresh acceptance before a further Entry.

4.11 Limitation of liability

To the maximum extent permitted by law, the service is provided "as is". The Operator is not liable for indirect or consequential loss, for blockchain-network errors or irreversible transfers caused by user error, or for third-party outages (including data, authentication, hosting, or payment providers). Nothing in these Terms excludes liability that cannot lawfully be excluded.

4.12 Suspension, voiding, and investigations

The Operator may suspend an account, void an Entry, or delay a payout where it reasonably suspects fraud, abuse, multi-accounting, sanctions exposure, or breach of these Terms, and may retain related records for audit and compliance purposes.

4.13 Changes to these terms

The Operator may amend these Terms. Material changes are versioned and require re-acceptance before a further Entry. The current version date is shown at the top of Section 4.

4.14 Governing law and disputes

These Terms are governed by the laws of the Republic of Poland, and the courts of competent jurisdiction in Poland have exclusive jurisdiction, subject to any non-waivable consumer-protection rights available to you locally.

5. Privacy Policy

Effective 4 June 2026. This policy explains what WorldCup26 collects and how it is used to run accounts, entries, deposits, referrals, prizes, and payouts.

5.1 Information we collect

WorldCup26 stores only the information needed to operate the game: your Google account email, display name, and user ID; your team picks and entries; referral relationships; consent records; wallet ledger entries; deposit claims and saved USDT sender wallet addresses; age-verification status; admin audit notes; and prize records.

5.2 Age and identity verification

WorldCup26 is for adults only. If you request a withdrawal or win a prize, the Operator asks you to send government photo identification so staff can confirm you are at least 18 before any payout. Those documents are reviewed off-platform and retained only as long as needed to evidence the check, prevent fraud, and meet record-keeping obligations. The game database records only the review outcome (pending, verified, or rejected), the review timestamp, and an admin note — it does not store or publish your identity documents.

5.3 How we use it

The Operator uses this information to authenticate users, prevent duplicate or abusive entries, verify USDT deposits, assign subscriptions, calculate leaderboards, process referrals, settle prizes, provide support, and keep auditable records.

5.4 Payment and blockchain data

Deposit claims include the network, receiving address, sending wallet address, transaction hash, claimed amount, verified amount, and review status. Blockchain transactions are public, so transaction hashes and wallet addresses may remain visible on external block explorers even if your WorldCup26 account is later deleted.

5.5 Sharing and processors

Data is shared only as needed to run the service — including with authentication, hosting, database, analytics, payment, compliance, support, or professional-service providers. WorldCup26 does not sell player personal information.

5.6 Retention

Account and gameplay records are kept for as long as needed to operate the contest, resolve disputes, prevent fraud, and satisfy record-keeping obligations.

5.7 Your rights and requests

You may request access, correction, or deletion through the Operator's published support channel, subject to records that must be retained for security, tax, compliance, or audit reasons.

5.8 Security

WorldCup26 uses Google sign-in, server-side authorization, role-limited admin tools, and database access controls to protect account and wallet records. No internet service can guarantee absolute security, so users should protect their Google account and report suspicious activity promptly.

6. Responsible Play Policy

6.1 18+ only

WorldCup26 enforces a self-attested 18+ confirmation before any Entry, and document-backed 18+ verification before any payout.

6.2 Self-exclusion

Participants may activate self-exclusion, which pauses new deposits, subscriptions, and entries. (Self-exclusion does not block a participant from withdrawing an existing balance.)

6.3 Participation limits

Participants may set entry-ticket limits, and the Operator may apply configurable deposit caps (per-claim and rolling 24-hour) and withdrawal caps.

6.4 Support resources

The Wallet surfaces responsible-play controls and support-resource links. Because WorldCup26 is a single-entry game of skill rather than a continuous-stake product, the structural risk profile is materially lower than gambling products; nonetheless the Operator provides these controls as good practice.

7. Compliance, AML, and KYC Summary (for payment & banking partners)

This section summarises the controls relevant to a payment or banking partner's onboarding review. It is provided for transparency and does not constitute legal advice.

7.1 Regulatory status — registered Virtual Asset Service Provider (Poland, EU)

The Operator, Stack Finance sp. z o.o., is a Polish company entered in the national Virtual Currency Business Activity Register (the Polish register of virtual-asset service activity) under number RDWW-1102, with effect from 9 January 2024. The register is maintained by the Director of the Revenue Administration Chamber in Katowice under the Polish Act of 1 March 2018 on Counteracting Money Laundering and Terrorism Financing (the Polish implementation of the EU AML framework). The Operator therefore acts as a registered Virtual Asset Service Provider (VASP) and is subject to Polish and EU AML/CFT obligations — including customer due diligence, transaction record-keeping, and suspicious-activity reporting. The certificate of entry (no. 2401-CKRDST.4225.2.2024, apostilled under the 1961 Hague Convention) is available to the reviewer on request.

7.2 Nature of funds flow

Participants fund an internal USDT Wallet; from that balance they pay a fixed subscription for a single Entry. Prizes to top-ranked participants are paid out in USDT after verification and approval. There is no peer-to-peer betting and no house book.

7.3 Customer due diligence (KYC)

- Identity: Google-authenticated accounts only; one account per person.
- Age verification: document-backed 18+ verification is mandatory before any withdrawal or payout; payouts are blocked until the account is verified.
- KYC/AML at payout: identity and source-of-funds review, sanctions screening, and AML monitoring are applied at the payout and withdrawal stage as the natural control point, in line with the Operator's onboarding obligations.

7.4 Transaction monitoring and limits

- Configurable per-claim and daily deposit caps (rolling 24-hour window).
- Configurable per-request and daily withdrawal caps.
- Every credited deposit and approved withdrawal requires an admin audit note and records the external transaction reference.

7.5 Sanctions and geographic controls

The Operator applies configurable allow/block country controls to deposits, subscriptions, and entries, and screens payouts for sanctions exposure before release.

7.6 Record-keeping and auditability

- A durable wallet ledger is the single source of truth for balances.
- A per-prize payout ledger and settlement records provide a full audit trail.
- Admin actions are authenticated, allow-listed, and attributed to the acting operator.
- Consent and referral-terms acceptance are timestamped per user.

7.7 Refunds and chargebacks

Subscriptions purchase a single Entry into a skill contest and are generally non-refundable once the Entry is locked, save where required by law or to correct an Operator error. The Operator may void entries and reverse referral rewards in cases of fraud, abuse, or chargeback.

8. Contact

For account, deposit, payout, referral, or prize questions, or to exercise a privacy request, contact the Operator through the published support channel:

- General support: support@worldcup26.world
- Age / identity verification: age-verification@worldcup26.world
- Website: https://worldcup26.world

9. Document Completion Notes (remove before sending if preferred)

The operator name, registration numbers (KRS / NIP), virtual-asset (VASP) registration, jurisdiction, governing law, and contact details for Stack Finance sp. z o.o. ("Stack Finance LLC"), Poland have been completed from the company's VASP certificate of entry. Before submitting this pack to Revolut, insert the one remaining item below from the company's KRS extract (it appears in the Document Information table at the top of this pack):

- **Registered office address** — the company's registered office address in Poland, as shown on the KRS 0001077664 extract.

Disclaimer: This pack is Stack Finance LLC's own policy documentation prepared for a banking / payment onboarding review. It is not legal advice. Stack Finance LLC should obtain qualified legal counsel for the legal classification (game of skill vs. other) and the licensing position in each market in which it operates before accepting real-money subscriptions.

End of document — WorldCup26 Game Rules, Terms & Conditions, and Privacy Policy (v1.0, effective 4 June 2026).
